(54) **INK JET PRINTING METHOD**

(57) Abstract:

PROBLEM TO BE SOLVED: To provide an ink jet printing method, with which the granular feeling of a light-colored part is improved, the coloring uniformity of a mixed color part in color recording is enhanced and smooth gradation is realized.

SOLUTION: In this ink jet printing method for producing

images having gradation on a woven fabric or a non-woven fabric with two or more different inks, the densities of the dye content of which are different from each other, an ink containing dye solvent is given to the positions of image dots formed with the ink having the lower density of dye content before or after the formation of the images and, after the formation of the images, the images are coloring-treated by heating.
